

[illegible]

Visualization 2:
Considering only the top 5 purposes of donation, how does the relationship between countries look like in terms of purposes? What composition of purposes do the donations between each pair of countries have? Are there countries that donate to a given country using multiple purposes? Or do counties always donate using one single purpose when donating to another country? The same as the previous question, we only care about the top 10 recipients and the top 20 donors here.

Explanation: Top 5 purposes are by maximum amount of donation done are shown using different colors in a pie. The size of the circle is based on the total amount donated for all the 5 purposes.

X axis: Top 10 Recipients

Y axis: Top 20 Donors

Proportion of the pie represents the amount for the particular purpose.

Colors: Top 5 purposes
